

BOTANICAL PRINTING

Saturday, October 24, 2026, at GroWild

9am-3:30pm

Did you know many leaves and flowers will share colors and create beautiful prints on fabric? Botanical printer Jan Quarles will teach you the basics of this amazing process and GroWild co-owner Terri Barnes will share her knowledge of native plants for printing in this popular workshop.

You'll learn how to choose good printers, place plants (leaves and flowers) for a design and then roll, dye and steam fabric in a layered technique for beautiful prints. Your class fee of \$195 includes a kit with extensive notes, two pre-scoured and pre-mordanted scarves, gloves, dowels for rolling, and a pre-dyed blank for adding color. All necessary equipment is provided.

This year we will focus on a white print as we learn about iron modifiers and cotton mordants. We'll do a colored silk scarf with a dye blanket and a bundle surprise! Bring your lunch to eat in the wonderful GroWild pavilion where we work and remember to wear old clothes.

Class meets 9 a.m. to 3:30 p.m. Please contact Jan Quarles with questions or to request an invoice to register for the class. Her email address is jan37129@yahoo.com. Enrollment is 10 students maximum.

Class will be held at GroWild, Inc., 7190 Hill Hughes Rd., Fairview, TN 37062
